Letter of Recommendation

Dear Mr., Mrs.

I am writing this letter of recommendation to support Diana-Mihaela Dorobanțu who is applying for an Erasmus+ scholarship at Nagaoka University of Technology in the field of *Information and Communication Technologies*.

I have known Diana-Mihaela Dorobantu for half of year as she has been my student in the *Stochastic Processes and Models* course and seminar that I have taught at the Bucharest University of Economic Studies, master program *Applied Statistics and Data Science*, during her first semester of the first academic year, 2021-2022.

During the courses and seminars, as well as during the elaboration of the term project and its final presentation, I have noticed her intelligence, earnestness, perseverance, determination and critical thinking. Her contributions to solving exercises in class were always valuable and accurate. Diana is a hard-working and motivated person, as she took the homework assignments of the discipline very seriously.

The term project's subject was a very interesting one and its elaboration and presentation were solved in a rigorous and well-documented manner, therefore she obtained the maximum grade 10. Her final grade obtained in the final exam placed Miss Dorobantu among the best students of the year.

Diana has a very pleasant disposition, is cheerful, polite and kind; she has common sense, a warm personality, putting everybody in her presence at ease, and cooperates very well with her colleagues. Another thing I noticed is the hard work with which Miss Dorobantu takes on new challenges.

Diana is a student who values high standards in education and her main goals are studying new things and experiencing new learning opportunities. I am very confident that she will benefit from further study as she has both the wish to do so and the intelligence to develop his abilities in a new dynamic educational environment. Therefore, I warmly recommend Diana-Mihaela Dorobanțu to be considered for the Erasmus+ scholarship at Nagaoka University of Technology. Please, do not hesitate to contact me if you have any further questions.

Sincerely,

Mihaela Covrig

PhD, Associate professor

Bucharest University of Economic Studies

Department of Statistics and Econometrics

To Whom it May Concern / Dear Mr., Mrs.

It is with great pleasure that I find myself writing this letter of recommendation for Diana-Mihaela Dorobantu. She is an excellent employee who on a daily basis goes “above and beyond” in her activities. She developed integration Python layer, implementation of data transformations in SQL, data modeling, visualization in Power BI and ETL’s techniques. She learnt how to use Microsoft tools like Visual Studio Code, SSMS and Azure Dev Ops.

She has proven to be a persevering person, who does not stop in the face of adversity, which augurs a great future for her in the IT world where she will know how to find solutions to problems. On the other hand, she has been able to develop her ability to work as part of a team. She knows how to organize herself in a superb way, combining everything that is entrusted to her in an efficient way. Her ability to analyse data is above average, which allows her to approach problems from a broader perspective, together with a great capacity for learning, means that she has a great future as an engineer in any position within a competitive team developing data-driven applications and IT in general.

Diana-Mihaela Dorobantu is an invaluable asset and I highly recommend her for the scholarship graduate programme of Nagaoka University of Technology. If you’d like to discuss her attributes in more detail, please don’t hesitate to contact me.

My phone is : +41764685422 and email: santiago.garcia@runiczero.com in case of any query.

Sincerely,

Santiago Garcia

Head of IT engineering in RunicZero Data Platforms
